helux | THEMIS ICE

Your Digital Transformation Journey Starts Here.
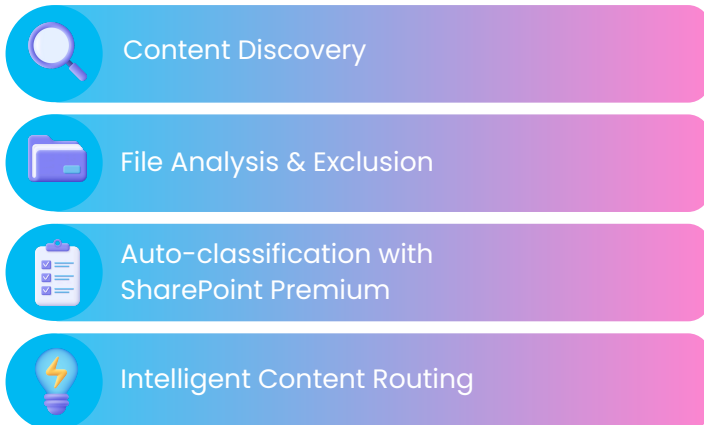

Overview

THEMIS ICE (Intelligent Content Enrichment) is a no-code intelligent migration product that can auto-classify and enrich your unstructured content using artificial intelligence during content migration.

- Content Discovery
- File Analysis & Exclusion
- Auto-classification with SharePoint Premium
- Intelligent Content Routing

With THEMIS ICE you can intelligently migrate content from file shares, OpenText, or other content sources to SharePoint Online. You can even clean up your current SharePoint Online content by migrating and enriching the content all while classifying and tagging it during the process.

Benefits of THEMIS ICE

- Save time and effort with rules-based routing
- Enrich content with metadata
- Reduces migration and cloud storage costs
- Auto-classification with SharePoint Premium
- Eliminates information silos and disconnected systems

Organizations are burdened by having up to 80% of their information in siloed file shares that are unstructured, hidden, and contain significant ROT (Redundant, Obsolete, and Trivial) content.

This content poses significant risks to an organization along with the technical debt and cost of managing this unnecessary content.

helux

Cham Tahn, CTO at HELUX

"THEMIS ICE analyzes content and provides insights by leveraging SharePoint Premium AI models to enable intelligent migration."

The THEMIS ICE Process

Ingest: Identify content
1. Determine what to migrate
2. Define connectors for content

1

Clean Up: Filter out
1. Remove duplicates
2. Remove obsolete
3. Remove trivial

2

Enrich: Get context
1. Evaluate content against available SharePoint Premium AI models
2. Classify
3. Metadata extraction

3

Define Rules: Setup Actions
1. Setup rules and conditions
2. Define actions
3. Setup connectors for destinations

4

Migrate: Execute rules
1. Preview results
2. Route files
3. Summary report

5

THEMIS ICE can remove:
- Duplicate content
- ROT - Redundant, Obsolete, and Trivial files

THEMIS ICE allows you to:
- Inspect your content at each step
- Modify and map metadata
- Intelligently route your content to multiple locations

THEMIS ICE can analyze your discovered content and apply AI:
- Classify content before migration with SharePoint Premium integration
- Enrich content by extracting metadata from the content of the files to be migrated

THEMIS ICE can migrate your content preserving:
- Original authors and timestamps
- Original versions and version tree
